

Lantern Monster

Instructions No. 2856

Difficulty: Beginner

Working time: 2 Hours

Watch out - the monsters are loose. Cute monsters light up the world. Create a **monster lantern** and make your child's eyes light up with joy at the next lantern procession. We explain how it's easy to make your own monster lantern.

Finally, bend the wires of the fairy lights into a large ball and place it inside the lantern. You can also fix individual bulbs with hot glue, e.g. if you are making ears for your monster in which it should also light up. You can put the battery compartment inside the lantern or glue it to the top of the lantern with hot glue. If the lantern stick is too long, you can shorten it to the desired length with scissors.

Thanks to the timer function of the light chain, the lantern can be used as a night light in the children's room after the parade.
