

Making lanterns with edding

Instructions No. 728

Difficulty: Beginner

Working time: 30 Minutes

Simply label and paint lantern foils with edding® pens and then create beautiful Lanterns ! Let this idea from the house of edding® inspire you to make your own creations.

Transparent paper into a cylindrical shape and leave an adhesive edge about two cm wide. Attach a lantern lid and base. Now fix the edge of the cylinder.

Cut the paper into strips, according to your own colour taste and in the desired widths. Now attach the strips with vellum paper-glue.

Use vellum paper, because there are no glue spots to be seen afterwards. Once the adhesive is dry, paint on the motifs using the edding gloss paint markers.

Now only still attach the lantern bracket and wooden stick, light the tea light and sing.

Must Have

edding 751 "Gloss varnish-Marker", Black
